

Bridgit™

Conferencing Software

Complete Conferencing Solution

Whether you're meeting and working with people across town or around the world, Bridgit conferencing software offers a simple and affordable way to share voice, video and data over the Internet. It's quick, it's easy – it's a complete conferencing solution.

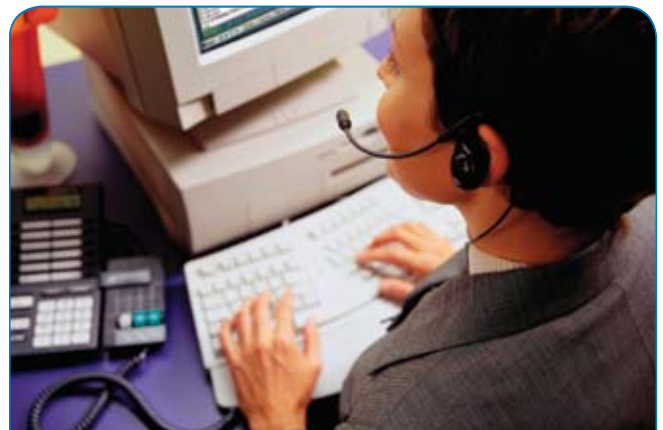

Affordable and Effective

With just an Internet connection, you can write over any application or share your desktop with other participants and talk them through any scenario – all in real time, right from your desk or from a SMART Board™ interactive whiteboard.

Reduce travel costs, make decisions quickly, engage audiences with dynamic content and keep projects on track by including all stakeholders in your meetings no matter where they are in the world.

It's About Time

Bridgit software takes the clutter out of conferencing and helps you get things done. Simply name your conference, invite your participants and launch your session. In less than a minute you can respond to a client, get feedback from colleagues, start a training session or follow up with a sales prospect.

How Can Bridgit Work for You?

- ✓ **Training**
Hold remote training sessions that engage audiences, encourage participation and reduce travel costs.
- ✓ **Sales**
Host product demonstrations, sales presentations or webinars with customers and prospects.
- ✓ **Collaboration**
Communicate with anyone, anywhere, anytime whether it's a planned meeting or an impromptu discussion.
- ✓ **Project Management**
Keep projects on track and stakeholders informed with status meetings, weekly team briefings and real-time collaboration.

Share Your Desktop

What you see...

they see....

Features

Simple conferencing – Connect quickly to anyone with an Internet connection and share voice, video and data. You can start or join a conference at any time, right from your desktop.

Built in VoIP – Hear all participants in the conference without purchasing an additional audio conference bridge or incurring long distance charges. Works with your existing microphone headset or room conference microphone.

Desktop sharing – Share desktops instantly and alternate desktop sharing. Participants can see anything you run on your desktop, such as spreadsheets, presentations or websites.

Write over desktops – Highlight information by writing over a shared desktop. More than one participant can write at the same time.

Multipoint webcam support – Allows participants to see video from up to four participant sites.

Remote control – Take control of another participant's desktop to demonstrate a solution or provide technical assistance.

Presentation tools – Direct attention with the spotlight or pointer tools to focus on a specific screen area.

Automatic invitations – Send invitations with an automatically generated e-mail.

Secure and reliable environment – Protect information with password options and SSL encryption.

SMART Board interactive whiteboard integration – Write directly into an open Notebook™ file when you use Bridgit software with a SMART Board interactive whiteboard (optional).

Simple toolbar – Access the on-screen tools quickly and discreetly.

Language support – Enhance communication with Bridgit software's support for 13 languages. You can easily switch between languages directly from the interface.

Purchase options – Subscribe to a monthly plan or host Bridgit software on your own server.

System Requirements for Windows® Operating Systems

Server

Maximum of 150 concurrent users allowed per server. In addition, each server must meet the following minimum requirements:

800 MHz Pentium® III processor • Windows® 2000, Windows XP or Windows Server™ 2003 operating system

• Any Windows network software or Novell™ NetWare® 6.0 software

If you use a faster server or one with no other applications installed, your system will perform better.

Client

System requirements (without using webcams):

Pentium II 266 MHz processor • Windows 98, 2000, Me, XP or Windows NT® 4.0 operating system • 128 MB RAM • a 56 Kbps Internet connection

System requirements (using VoIP and webcams):

Pentium III 800 MHz processor • Windows 98, 2000, Me, XP or Windows NT 4.0 operating system • 256 MB RAM • a broadband Internet connection

VoIP requirements:

Sound card • speakers or a PC headset • a PC microphone

Webcam requirements:

Compatible with the Video for Windows (VFW) driver • supports 24-bit color • supports image sizes of 176 x 144 or 160 x 120

Software Requirements

The Bridgit software client requires Internet Explorer 5.0™ or later. However, Internet Explorer doesn't need to be your default browser. Bridgit software can use a variety of Web browsers to access the Internet, including:

Internet Explorer 5.0 or later • Netscape 7.0 or later • Mozilla 1.0 or later • Opera™ 7.2 or later

Bridgit software also requires an e-mail program to invite participants to conferences. Although the Bridgit software client works with a variety of e-mail programs, it has been designed to work best with Microsoft Outlook.

If you have SMART Board software, make sure you have version 7.1.3 or later. Earlier versions of SMART Board software do not support some of Bridgit software's features, including annotations. To download a free SMART Board software upgrade, visit SMART's website at www.smarttech.com/customers/software.htm.
