

The image shows a modern conference room. The wall is covered in a dense array of small, square acoustic panels. Two large, curved monitors are mounted on the wall, displaying a blue screen. In the foreground, there are rows of brown upholstered chairs and white tables, suggesting a meeting or presentation environment.

# **i-CONTROL** Ltd.

## We Are i-CONTROL

In 2001, i-COTNROL was founded under Newmark Group in Hong Kong. Due to our rapid growth and expansion, we are now Hong Kong's leading Audio-visual System Integrator, and established the company offices in Shanghai and Macao as well. Most of our core values can be revealed from our company name, i-CONTROL, in which the "i-" suggests "innovative", "interactive", "intelligent", and "integrated solutions". We are renowned for providing and managing the professional quality of work in all our projects, by building up our expertise in delivering professional consultation and implementation/ maintenance services as well as the seamless system integration. We are proud ourselves on our ability to provide wide ranges of scope, complexity and quality audio-visual projects.

Over years, the certifications we acquired proven our professionalism in system designs and installations as well as the precise management practices. Below are the professional certificates we awarded and trust we acquired from the noted organizations.

## WE HAVE A BETTER IDEA.

We specialize in providing various advanced, reliable, and state-of-the-art audiovisual technologies with system integration. Over the years, our one-stop services have allowed our clients to enjoy the best quality systems, from customized project/ system design, professional system consultation, mature installation, project management to maintenance services.

### Interactive Presentation Solution

i-CONTROL provides media consultation, design, integration, and installation of audiovisual technologies for classroom and other meeting, treating and recreational facilities.

### Lighting Control Solution

Custom design lighting control system provides you with personal control of workspace lighting. It allows you to experience the easiest and user friendly way in lighting control. Different lighting scenes are programmed for each area and purpose. All lights are preset according to your needs, such as for AV presentation, video conferencing or meeting. You can design your lighting system just the way you want.

### Video Conferencing Solution

Enhances the impact and quality of communications through audiovisual tools and solutions. Our expertise in room design and customized room control systems ensures the successful integration of audio, video and data presentation tools, which translates into user-friendly and easy-to-use meeting facilities.

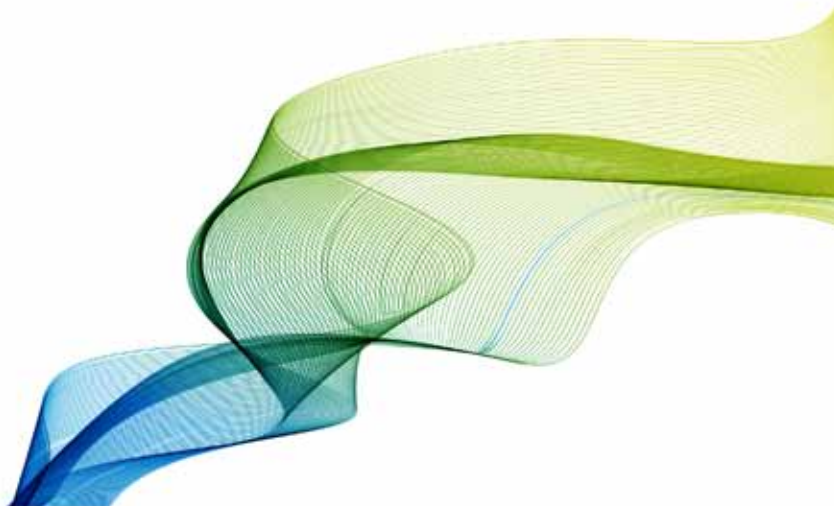

### Smart Home Automation Solution

Music, video, lighting and security systems can be fully integrated throughout the home and controlled at the touch of the button. A number of difference programmable control systems are available offering various levels of

### Central Control Solution

Central control system provides a simple graphical user interface to all the equipments in the room through a single remote control point. User can simply walk up to the controller and figure out how to use all the AV equipments without formal training. Each system (such as lighting, Blu-Ray player, projector, screen, audio system, PC and CCTV) can be controlled from the touch panel.

### Simultaneous Interpretation & Conferencing Solution

i-CONTROL provides a total conferencing system and voting system, each unit includes intelligent audio reinforcement and built-in speakers. Chairperson has the option to control the microphones of other members, and can view the queues list via a simple touch panel. After every resolution, the queuing list of members appears on a large screen (visible to the audience) as they request to speak. The chairperson controls various speaking modes - including voice activation, request-to-speak and push-to-talk - which in helps conference run smoothly.

### Multimedia Distance Learning Solution

As the wireless internet technology become matures and the cost of live streaming system become affordable. Distance learning become the trend of education and training. Learning become much more flexibility and accessible, students can attend the class from anywhere and access experts and tremendous volume of online database at the same time. Professional recording and streaming system provide one-stop and easy-to-install solution for distance learning.

### Digital Signage Solution

Digital signage system is extremely flexible, it can be a single screen place in the lift lobby or multi-display to form a giant video wall across the mall. With 24/7 professional flat displays you can playback infotainment advertising or environmental simulation contents all day long to audience. Using professional digital signage software, you can do a centralized control and management for regional network distribution, multi-scheduling, live snapshots, etc. in the central control computer.

### Public Address Solution

i-CONTROL offers the high quality, cost-effective reliable solution of public address systems. The system is easy to use and it includes many advanced features for broadcasting and music. i-CONTROL provide custom-made solution in even the most demanding applications, including congress center, conference venues, and theaters.

## WE PROVIDE ONE-STOP-SERVICES.

project commencement

project completion

We pride ourselves on our ability to provide clients with an audio-visual solution that is tailored to their individual needs. We aim to create impressive solutions that are simple to operate and maintain. Our dedicated team designs and plans suitable audio-visual solutions only after careful deliberation of the client's specific needs and wants, which includes the recommendation of necessary equipment that best fits the requirements of the client.

Since we are listed as EMSD (HKSAR) Certificated Supplier and Specialist Contractor in Audio and Video Electronics Installation, we have gradually increased in capabilities and intellectual resources to become Hong Kong's leading Independent Audio Visual Solution Provider. Multi-talented and multi-faceted, we are able to provide unique and robust solutions within tight timelines and on budget.
